FRIDAY, MARCH 4, 1887

The demand for better preparatory teaching—that is, for better preparatory teachers—from all parts of the country is fruitful in suggestions looking to a supply. According to the census of 1880, the sum of all the lawyers, physicians, surgeons, clergymen and journalists in the country was 226,811; the number of teachers was 227,710. It is said that not one in ten is a graduate of a normal school. It is admitted that there is a science of education and an art of teaching. Is this art then not a profession? To this question the Chicago Tribune, speaking for the United States, boldly answers no. What the Tribune means plainly is that the greater part of the 227,000 teachers, outnumbering all the other professions together, ply their calling not as a vocation but rather as an expedient to make a livelihood, while awaiting their actual settlement in life. For it is to be remembered that 154,375 of the 227,000, or over two-thirds, are women whom there is no ground to assume are matrimonially disinclined.

The belief is prevalent that there is a strong disposition among leaders in the Republican ranks in favor of a Pacific Coast man as a candidate for the Presidency in 1888. The silver question will, in all probability, be the determining issue, and any one who receives the nomination must have a record favorable to the white metal. The Republican States of the Mississippi Valley, as well as the Democratic States of the South, are a unit in favor of the Bland law as it stands. Iowa, Minnesota, Illinois, Indiana, and probably Ohio and Nebraska can be counted on to subvert the interests of free and unlimited coinage of silver. These, together with other alliances that can be rallied in support of the move, is assigned as the cause for the leaders to favor the Pacific Coast at the next National Republican Convention with the nomination. If properly presented to the East, the move can be made to win.

The proposition to divide the Territory of Idaho and cancel its territorial existence by giving the northern portion of it to Washington Territory and the remainder to the State of Nevada, is growing in favor with the people and press of Idaho. They are anxious to receive all the benefits and advantages of State government, and can see no other way to obtain them at an early day. The northern strip being joined to Washington will receive the benefits of the proposed admission of the latter as a State, a change which cannot long be postponed. The annexation with Nevada would at once put the southern portion of Idaho on the footing of a State. The House passed a bill Wednesday, annexing the northern panhandle of Idaho to Washington Territory. The same bill has already passed the Senate, and the measure is now in the hands of the President.

The thirteenth session of the Nevada Legislature adjourned *sine die* last night. Some good work was accomplished by the body; much was left undone. The general character of what was accomplished cannot well be learned until there is an overhauling of the successful bills by those able to detect unconstitutional defects and at the same time recognize what are the wants of the people. It is to be hoped that the bungling and foolish work of two years ago has not been repeated. The belief is common, though, that the labors of the session just closed will bear close and intelligent scrutiny.

Cardinal Gibbons has submitted a report to the Propaganda on the Knights of Labor, in which he states that he can see no reason for condemning the association. The report has no bearing whatever on the McGlynn case, nor will its endorsement by the Pope carry with it anything more than an approval of the general plan of the order.

### Cardinal Gibbons Sustained by the Pope.

### A DESTRUCTIVE EXPLOSIVE

### A British Vice-Consul Captured by Savages.

### A Bloody Affray.

DENVER, Colo., March 3. A Wallace, Kansas, special says that the situation of the Coronado-Leodi war remains unchanged. Both towns are surrounded by a strong cordon of armed men, who permit no one to enter. The men in both towns sleep with their guns, and after gaining admission, a stranger finds a Winchester at every turn. They stand in doorways, and the merchants bring their guns to wait on customers. Men patrol the streets of the city all day and night. The surrounding country is as excited as the towns, and about as equally divided. The Coronado sympathizers are for the most part in town with their ammunition and guns, and a Coronado man said to-day that within an hour 500 men could be recruited in the town ready to defend it with their lives.

At Leodi the cry is for revenge. The citizens are as excited as they were on the day following the shooting, and they are unanimous in their determination to attack Coronado at the first opportunity. This will probably be offered on Thursday next, when the county elections occur.

Charlie Coulter and Bill Raines were the ring-leaders of the Leodi crowd, who went over to Coronado on Sunday morning and drank considerable whiskey and beer. Coulter, who was a desperado of the worst type, and who is the fourth of the family of Leodi to die with boots on, promised to return the beer consumed. He and Leodi, got the beer and five companions, three of whom were armed, and returned in a wagon and buggy. They visited a druggist who was sick in bed, and made him get up. Coulter ordered him to dance, and fired a shot at his feet to make him obey. The druggist, however, offered to treat if he would lower his gun and the offer was accepted. The men then went into the street, and, according to the story, began firing indiscriminately. Coulter did most of the shooting. A Coronado man was struck over the head with the butt of Coulter's gun. The Loomis brothers interfered, and requested the Leodi men to stop shooting the citizens. For a reply Coulter turned on both the Loomis boys and struck at them. He performed an old plainsman's trick by hitting Bob Loomis over the head and shooting John Loomis in the leg at the same time. John was standing back of Bob and as Coulter fired he sprang forward and clinched with him.

The Leodi crowd, according to the story of the Coronado men, then began firing at two citizens who were running up the street. A dozen Coronado men, who had gathered in a store, then opened fire, and Coulter seemed to be the target for them all. The firing only continued a moment, and when the smoke cleared away Raines, Coulter and Watkins, who were on the pavement, had fallen to the ground dead. The other men were in the wagon, and Jas. Dunning and Johnson were seriously wounded. A. N. Bony, the seventh man of the Leodi crowd, escaped without injury. There were 14 bullets in Coulter's body, and Raines was wounded in 11 places, every one of which would have been fatal. The two Loomis boys were only slightly wounded. Jensen, it is thought, will die, but Johnson and Dunning will recover.

On the day following the trouble, Sheriff Edwards secured warrants for the arrest of the two Loomis brothers, Bob Litley, Tom Allen and Postmaster Fowler, who is alleged to have been implicated in the shooting from the door of his office.

The half way stage, which connects with the conveyance from Leodi and Coronado left Wallace this morning taking the first mail received since last Saturday. It returned this evening bringing news of the renewal of hostilities. It appears from the intelligence at hand that two Leodi men who were not engaged in the trouble Sunday, left their town and started for Coronado. The outposts of Coronado opened fire at once. One of the men was shot and the other's hat was riddled with bullets and his horse killed. The man returned to Leodi and told the story. Great excitement followed, and a party organized to visit Coronado, but returned before reaching there.

**More of the Class Wanted.**

Of the many new comers to Reno and the immediate surrounding country, it is gratifying to note that not a few of them are pursuing a course in establishing themselves that is highly commendable. They are, in the strictest sense of the term, producers.

Several have purchased small tracts of land, and are preparing to raise vegetables, fruit, fowls, hogs, etc. They mean to farm on a small scale and utilize their parcels of land, even though they comprise but a few acres each, to the best possible advantage. There are hundreds of acres of land around Reno on which water can readily be obtained from the Truckee and other streams, that can be purchased for moderate sums and made highly profitable.

**The Closing Exercises.**

From Senator Fish who arrived this morning from Carson, a GAZETTE reporter learned the following: Just before the final adjournment of the Legislature, the members of the Assembly presented Speaker McDonnell with a gold headed cane and speaker pro tem Drury with a gold watch chain.

In the Senate, Lieutenant Governor Davis was presented with a fine gold-headed cane, and President pro tem Pouljade was the recipient of an elegant gold watch. The Democrats of the body presented Senator Westerfield with a very fine cane, gold mounted.

**Useful and Hurtful Medicines.**

There is a certain class of remedies for constipation absolutely useless. These are bismuth and potions made in great part of podophyllin, aloes, rhubarb, gamboge, and other worthless ingredients. The damage they do to the stomachs of those who use them is incalculable. They even do the worse, it is true, but always do so violently and promiscuously, and besides grip the bowels. Their effect is to weaken both them and the stomach. Better far to use the agreeable and salutary aperient, Hostetter's Stomach Bitters, the laxative effect of which is never preceded by pain, or accompanied by a convulsive, violent action of the bowels. On the contrary it invigorates those organs, the stomach and the entire system. As a means of curing and preventing malarial fevers no medicine can compare with it; and it remedies nervous debility, rheumatism, kidney and bladder inactivity, and other inorganic ailments.

MISCELLANEOUS.

KING'S EVIL

Was the name formerly given to Scrofula because of a superstition that it could be cured by a king's touch. The world is wiser now, and knows that

SCROFULA

can only be cured by a thorough purification of the blood. If this is neglected, the disease perpetuates its taint through generation after generation. Among its earlier symptomatic developments are Eczema, Cutaneous Eruptions, Tumors, Boils, Carbuncles, Erysipelas, Pustular Ulcers, Nervous and Physical Collapse, etc. If allowed to continue, Rheumatism, Scrofulous Catarrh, Kidney and Liver Diseases, Tubercular Consumption, and various other dangerous or fatal maladies, are produced by it.

Ayer's Sarsaparilla

Is the only powerful and always reliable blood-purifying medicine. It is so effective an alternative that it eradicates from the system Hereditary Scrofula, and the kindred poisons of contagious diseases and mercury. At the same time it enriches and vitalizes the blood, restoring healthful action to the vital organs and rejuvenating the entire system. This great

Regenerative Medicine

Is composed of the genuine *Hondius Sarsaparilla*, with *Yellow Dock*, *Silica*, *Iron*, the *iodides of Potassium and Iron*, and other ingredients of great potency, carefully and scientifically compounded. Its formula is generally known to the medical profession, and the best physicians constantly prescribe AYER'S SARSAPARILLA as an

Absolute Cure

For all diseases caused by the vitiation of the blood. It is concentrated to the highest practicable degree, far beyond any other preparation for which like effects are claimed, and is therefore the cheapest, as well as the best blood purifying medicine, in the world.

THE WOODEN TOOTH PICK.

And Its Peculiar Relation to Lovely Women.

The most potential idol breaker I know is the toothpick, especially the wooden toothpick—2,500 for five cents is the drug store rate. Now, abstractly considered, the toothpick is not a bad idea. It enables a certain numerous class to cut a considerable figure in the shadow of first-grade hotels. It is also a familiar property of the after-breakfast horse-car farce that is daily played by those who publicly clean their finger-nails with their toothpicks and then clear away their teeth with them. The utilitarian may not always be politely bred, but he is a prodigious economist and should therefore command our respect. Dr. Samuel Johnson is remembered chiefly for his great intellect, though I suppose it is very well settled that his personal habits were perhaps as filthy as those of Socrates. In view of such history what may we not hope that time will bring to the man who gives his finger-nails precedence of his teeth in the office of the pick? Our education has so far advanced that we are not unforgettably offended by men's manipulations of that essential little instrument; but good God! what shall I say of the woman who goes abroad chewing a tooth pick of the 2,500-for-five-cents variety? She afflicts me far worse than the woman who *h-a-o-i-i-k-a*, and spits in public. You who have not seen her, give your imagination a poke and see what an image you can conjure up. I would much rather hear a woman swear than see her sucking a tooth-pick; and I am pained to observe that the latter habit grows on her. I am also curious to know, just as I am of nature, the man who can look at a tooth-pick-sucking woman and ever again feel for her one touch of that exalted sentiment with which the chivalrous man is proud to regard a woman as an institution. Yesterday I was crossing a crowded promenade. Ahead of me was a dainty female figure attired in the jauntiest of costumes. Her skirts were coquettishly raised in very proper horror of the mud that covered the crossing, and her exquisitely shod feet danced along in the way which every man understands, but which no man ever adequately described. She was such a picture of feminine grace, elasticity and flowing curves as poets and susceptible Old Uns catch inspiration from. Filled with admiring thoughts of the general loveliness of woman—thoughts that were unquestionably inspired by the poetic creature ahead of me—I obeyed the impulse to snatch a glance at her face.

Oh, friends! She was chewing a wooden tooth-pick.—[Detroit Free Press.

Life in the Paris Sewers.

It is possible for a short time to be robust but the majority of refined persons would prefer immediate death to existence in their reeking atmosphere. How much more revolting to be in one's self a living sewer. But this is actually the case with those in whom the inactivity of the liver drives the re-use matter of the body to escape through the lungs, breath, the pores, kidneys and bladder. It is astonishing that life remains in such a dwelling. Dr. Pierce's "Golden Medical Discovery" restores normal purity to the system and renews the whole being.

For weak lungs, spitting of blood, shortness of breath, consumption, night sweats, and all lingering coughs, Dr. Pierce's "Golden Medical Discovery" is a sovereign remedy, superior to Cod Liver Oil. By druggists.

"Her face so fair as flesh it seemed not, But heavenly portrait of bright angel's hue, Clear as the sky without a blame or blot, Through goodly mixture of complexions due. And in her cheeks the vermilion red did show."

This is a poet's description of a woman whose physical system was in a perfectly sound and healthy state and every function acting properly, and is the enviable condition of the fair patrons produced by Dr. Pierce's "Favorite Prescription."

Enjoy Life.

What a truly beautiful world we live in. Nature gives us grandeur of mountains, glaciers and oceans, and thousands of means of enjoyment. We can desire no better when in perfect health; but how often do the majority of people feel like giving it up disheartened, discouraged and worn out with disease, when there is no occasion for this feeling, as every sufferer can easily obtain sufficient proof that Gree's August Flower will make them as free from disease as when born. Dyspepsia and liver complaint are the direct cause of so many of our maladies as biliousness, indigestion, sick headache, constipation, nervous prostration, dizziness of the head, palpitation of the heart and other distressing symptoms. These doses of August Flower will prove its wonderful effect. Sample not 50c, 10c, 25c. Try it. nov29/87

HAY RACK, with attachments for unloading into feed racks.

FOR HANDLING HAY OR GRAIN, the Climax Machines excel all others by great loads. Each and all of these inventions are warranted to do all claimed for them. They are no experiment, but HAVE BEEN TRIED AND TESTED by the actual work of hundreds, and received the unqualified endorsement of all.

This is to certify that last season we used the Climax Stacker in putting up 1500 tons of hay, mostly blue joint; that it did its work well, and in my estimation is not equalled by any stacker or hay-lifting appliance on the coast.
